

Exceptional finance offer – a 100hp tractor from £72/week with 36-month warranty

Choice of limited-period finance packages for 102hp Landini 5-110H

Schemes for tractor alone and with TurboLift hydraulic loader

Option to stretch payments over five years at 0% interest

An exceptional package of finance schemes can put one of the newest Landini tractors on farm for the equivalent of just £72 per week, including three years' warranty cover, and spread the purchase over five years.

The schemes, available for a limited period, apply to a new 102hp Landini 5-110H Top equipped with a 36x12 power shuttle transmission and can include a TurboLift hydraulic loader.

"Buyers using the 5+55 option will effectively spread the cost of financing up to 45% of the tractor's retail price over five years, pay no interest and get three year's warranty cover," notes Ray Spinks, sales director at Landini distributor AgriArgo UK. "It's a package that in all respects offers financial peace of mind on a tractor set to become one of our best sellers."

There are four special finance packages in all, including a 3+33 months option on 50% of the retail price. With no interest charged, this scheme costs the equivalent of £124 per week.

A 'pause' variation allows the monthly payments schedule to be deferred for three months to help with cash flow, followed by 36 monthly contributions at only 1.5% interest.

The 5+55 months zero interest scheme, which includes an extra two years' warranty beyond the manufacturer's 12 month cover, puts the Landini 5-110H Top on-farm for the equivalent of £72 per week. For just £11 more, it can be extended to include the purchase of a Landini TurboLift loader.

"These finance schemes have been developed to bring certainty during a fairly volatile period for the financial markets," says Paul Bundock, European sales director at ARGO Finance. "In times when farm costs are generally rising, farmers can use these schemes to spread the cost of purchasing equipment for longer periods without even having to worry about interest charges."

The 5-110H Top is from one of the newest Landini tractor ranges developed to complement the simpler Powerfarm and better-equipped Powermondial. Its

new transmission sports a power shuttle and three-speed powershift, the 4350kg capacity rear lift has mechanical bottom link draft sensing, and a telescopic pick-up hitch is part of the standard package.

Air conditioning is also standard in the four-post cabin that gives the operator good all-round visibility.

The performance-matched Landini TurboLift Model 20 loader has a full-height lift of 1600kg to 3.8m and comes with hydraulic self-levelling that gives a clear view over the arms. Optional one-shot hydraulic couplings and Genius boom suspension add to the convenience and performance of this tough loader.
